Respondent A

Respondent	Ship Building Welder	
Interview Date	April 08, 2023	
Duration	23:31 minutes	
Language	Filipino and English	
Questions	**Answers**	**Translation**
What are the depression symptoms you experience as a Filipino migrant worker in Japan?	Sometimes isolating oneself mas gusto kong mapag-isa minsan. Minsan kapag masaya yung kasama gusto ko together din sa kanila pero sometimes depende or situational minsan pag medyo magulo sila, umiiwas ako, mas gusto kong mag-isa. Parang mas masaya minsan pag mag-isa. Irritability. Lalo na pagdating sa trabahoyung pagmay mali o kaya yung panget na nagagawa ko mabilis akong ma iritaparang mas gusto kong gawin mas mayo, malinis lagi ang trabaho pero hindi naman lagging ganun dapat. Kailangan ma-handle ko ng maayos ang sarili ko kung paano ko maiwasan ang pagiging	Sometimes, I isolate myself from people. I prefer to be alone sometimes. When the people around me is happy, I also want to be happy with them. On the other hand, it also depends on the situation. If they are messy that is the time, I prefer to be alone. There are times that being alone is satisfying. I experience irritability. I get irritated in my work when I commit mistake or if the output that I made is not perfect then I get easily irritated and would want to make my performance better, more refined but it is not always like that. I need to handle myself properly every time I get irritated. Every time I

	irritable ko sa isang bagay. Pag nag we-welding ako tapos panget ang gawa ko, naiirita ako sa sarili kopero sa pakikipagkapwa ko, sa ibang tao wala naman. Difficulty in sleeping. Minsan pag tumatawag yung family mo sa Pilipinas pag may problema sila ditto na rin pumapasok yung pagiging excessive worrying ko. Magaalala ka sa kanila o kaya lagi kang mag iisip hanggang sa hindi ka makatulog. Minsan ko sya nararanasan kunware may nagsabi sa akin na may problema sa bahay especially sa family, dun ako mas na aapektohan or dun sya mas nag titrigger yung pagiging excessive worrying ko kaya nahihirapan akong matulog. Pero minsan pag hindi ako nakatulog, maybe mga isang oras lang pala ako nakakatulog o kaya minsan nakapikit yung mata ko pero naglalakbay yung isip ko.	do my job and my output is unpleasant then I get irritated with myself but not with my co-workers. Just by myself. Difficulty in sleeping. I also experience excessive worrying when my family calls me from the Philippines and tell me about some problems. I always think and worry about them and because of it I have difficulty in sleeping. Sometimes when my family will tell me that they have a problem in my family, I get affected and it triggers my excessive worrying that's why I can't sleep. Sometimes I just usually have one hour of sleep. Even if I close my eyes my mind wanders.
• How are your depression	Mas Malala yung mga symptoms nung unang	The depression symptoms that I experienced

symptoms now?	dating ko kesa ngayon kasi habang na eexperience ko yung bagay na yun mas pumapasok sa utak ko yung positive na kailangan kong gawin para maiwasan ko to o kaya para di ko to maranasan. Pag nahihirapan akong matulog, nakikinig nlng ako ng mga kanta para mas mabilis makatulog, mga songs sa YouTube.	were more severe when I first came here but now, I choose to think positive thoughts every time I feel depression symptoms so that I can refrain from being depressed again. For instance, when I have difficulty in sleeping, I listen to songs from YouTube so that I will be able to sleep well.
• What are the instances that you get depressed?	May mga bagay lang talaga sa buhay na dumadating na na dedepress ka. It is a part of life. Aminado syang may mga depression symptoms siya na e-experience.	Depression symptoms just come randomly in our life. It is part of life.
• So, you are aware that you are experiencing these symptoms?	Yes.	Yes, I am aware that I experience depression symptoms.
What are the social media platforms that you use in dealing with depression symptoms?	Usually, Tiktok. Yung mga funny videos mga ganyan. Nakakainspired yung iba at the same time yung mga bagay na hindi mo nagagawa kagaya ng pagsayaw or pag dudub, nagagawa mo siya sa pamamagitan ng panunuod mo ng tiktok na eenganyo ko na gawin mo rin ang	Usuall, TikTok. I watch funny videos on TikTok. Some videos inspire me and make me do some things that I wasn't able to do, for example dancing and dubbing. I can do these things in TikTok and it motivates me to do things that I think could make me happy.

	isang bagay na sa tingin mo sasaya ka.	
• In a day, how many times do you use TikTok?	Minsan once month lang ako ng uupload ng videos pero everyday ako nanunuod ng tiktok. I consume mga 3 hrs medyo matagal sya pero nakaka relief sya. Naeentertain rin ako.	I usually upload once a month on TikTok but I watch TikTok videos every day. I usually consume 3 hours in a day. Three hours seem long but it helps me feel relieved. I am also entertained.
• What are the other social media platforms do you use?	Youtube. Listening to the music or watching funny videos or yung mge videos na gusto ko na iinspire ako. Yung nanunuod ako nga architectural design. Naiinspire ako sa sarili ko na tingin ko may possibility na kaya kong iimprove or kaya kong gawin yung bagay na iyon, kaya kong i-apply sa sarili ko.	I watch YouTube. I listen to music, funny videos, or inspiring videos on YouTube. For example, I watch architectural design videos. I get inspiration from it for me to improve my work, do the same thing, and even apply it in my life.
• So, you are watching these videos because you want to learn something?	Nanunuod ako ng video para may matutunan tulad ng mga bagay na hindi ko pa nagagawa gsto ko yung na chachallenge ako na gawin yung isang bagay na may magandan naman patutunguhan para maiwasan yung pagiging depressed or stress.	I watch videos so that I can learn something. For example, those videos that challenges me or those that I still haven't done. By watching, I can avoid stress or depression.
• What are the other social media platforms do you use?	Dalawa lang talaga ginagamit ko minsan pero pag contacting ginagamit ko facebook messenger.pag mga problems ko kunwarri	Generally, I only use 2 communication platforms, facebook and facebook messenger. When it comes to contacting my family, I use

	ganyan mas sanay ako na di magshare sa family ko ng ganyan kasi ayaw ko mag alala sila para sa akin kasi sa tingin ko yung depression ko iniisipan ko sya agad nga paraan kung pano ko sya maiiwasan nang sa ganun hindi sya lumala or mas ma trigger pa para maiwasan na rin.	facebook messenger. But when I have a problem, I don't share it with my family because I don't want them to worry about me. Every time I feel depressed, I will always find ways to avoid being depressed even more so that I will not feel worst or have more triggers to be depressed.
What are the positive effects of social media in relation to your depression symptoms?	Yes meron. Sa bawat tao ibat-iba yung naiitulong ng social media at sa iba naman hindi. Para sa akin depende mo sya i-aapply sa buhay mo kung gsto mo yung mga positive vibes kailangan dun ka lang naka focus then wag mong pansinin mga negative vibes para hindi ka ma apektuhan.	There are positive effects of using social media for me. Social media has a different effect in every person. Some has positive and some has negative. For me, it depends as to how you will apply it in your life. If you want to have more positive vibes then go have focus on it. Don't think and give attention to the negative vibes so that it will not affect you.
• Does it have a positive effect for you emotionally?	Yes, meron. Kunwari pag may masaya yung pinapanuod mo, sasaya ka rin deep inside you. Nakakainspire yung iba	Social media has a positive effect on me emotionally. When I watch happy videos, I also feel happy inside me. Some videos also inspire me.
• Does it have a positive effect for you physically?	Meron naman. Kunwari sa pananamit. Mas naiimprove mo yung sarili mo mas mag level up. Mga ganyan.	Social media has a positive effect on my physical appearance like how the way I dress. I am inspired to improve the way I look, to level up.

• Does it have a positive effect for you psychologically/cognitively?	Meron naman kasi nababalance ko naman,na hahandle ko sya ng maayos kung paano ko maiiwasan ano kailangan gawin para hindi ka maapektohan sa mga bagay-bagay sa paligid mo. Meron akong natutunan at naiaapply mo rin sa sarili mo.	Social media has a positive effect on me psychologically. When I use social media, it let me balance and handle myself as to how will I be able to avoid the things that will give me negative vibes around me. I learned from using social media and I was able to apply it in myself.
• Does it have a positive effect on your work performance?	Meron naman sympre pag masaya ka maayos mo yung nagagawa mo yung trabaho mo. Mas mag pursige ka na gawin at pagsumikan pang gawin yung trbaho mo. Naboboost yung mood ko.	Social media has a positive effect on my work performance. If I feel happy, then I can do my work better. I feel more motivated and inspired to do my job. It boosts my mood.
• Does it have a positive effect on your social relations?	Okay naman. Nashehsare mo sa kasama mo ang mga natutunan mo at the same time nagpapalitan kayo ng mga ideas lalo na yung mga idea ng iba na hindi mo pa nararanasan or never mo na experience. So nkakatulong yung mga kaibigan na nakapalibot sayo especially sa trabaho if may mas alam sila sa trabaho, so mas meron kang matutunana mula sa kanila. Mas inspired ka, mas masaya, mas dedikado mas ginaganahan ka sa trabaho mo if masaya	Social media has positive effect on my social relations. I am able to share what I learned to my friends and workmates and at the same time I also learn things from them especially those that I still haven't experienced or learned at all. The people around you can really help you especially in your workplace because you can learn from them. If you feel happy, you are more inspired more dedicated, and more dedicated in your job.

	ka sa trabaho mo	
What are the negative effects of social media usage in dealing with your depression symptoms?	Meron if negative yung mga pinapanuod mo so maapektohan ka rin non sympre. Pero it depends on your way pano mo ihandle yung sarili mo sa mga situation nay un. Kung pano mo matututunan na gawin yung mga bagay na tama at hindi tama. Sa ngayon wala naman syang negative kasi mas pinipili kong iniiwasan ang mga negative para hindi ako maapektohan.	Yes, there are. If you watch videos with negative contents, you will be affected. But it depends on you as to how you handle yourself in situations like this. You need to know the things that are right and aren't right for you. For now, there are no negative effects of social media usage in my life because I choose to avoid things that will have negative impact on me so that I will not be affected.
Does social media give your more positive or negative impacts in dealing with depression symptoms?	Mas maraming positive kasi yung talaga ang goal ko, go lang always sa positive.	For me, there are more positive effects because my goal is to always think positive.
• Do you have other negative effects on you emotionally, physically, psychologically/cognitively, work performance, and social relations?	Wala naman.	There is none.
Do you think social media usage cultivate resiliency of OFW? Why	Masasabi kong yes. Kasi based on my experience kung ano yung nararanasan ko yun	Yes. If I experienced these things then maybe they also experience the same thing. For

do you think so?	din yungnararanasan nila. Kunwari kung nandun lang sila sa mga positive or masasaya yung pinapanuod nila mas nakakatulong yun sa kanila na magpatuloy at magtrabaho pa.	example, if they are always thinking about the positive side or happy videos then it will help them to continue and persevere more.
What social media platforms do you recommend for fellow Filipino migrant workers to use when they experience depression symptoms?	Tiktok or youtTube tulad nang sakin	TikTok or YouTube videos like mine.
• How can they use it?	Kailangan ang gawin lang nila is dun lang sila lage tumingin sa positivity wag sila mg isip ng negative kasi once na nag isip sila ng mgaative dun sila mas lalong mahihirapan or makakaisip hanggang sa ma down sila. Kaya kung ano dapat ang makakatulong sa kanila, kunga ano yung magpapasaya sa kanila yun ang kailangan gawin at sundin nila.	I think what Filipinos need to do is to always think about the positivity of life and never think about the negative thoughts because once they will think negatively then it will let them feel worst until they will feel down. That's why they need to do what they think will make them happy and will help them feel happy.
How can you suggest the usage of social media in your workplace in relation to depression symptoms?	Sa tingin ko minsan kasi pag ditto sa japan bihira ka lang mgkaroon ng boss na makahalubilo mo at makakasama mo sa labas, kasama mo kumain or makikipagkwentohan sayo. Sa tingin ko ang maisasabi ko sa boss ko is yung communication, yung makikipagkwentohan sila yung malalaman	I think here in Japan, it's not common that you will have a boss whom you can easily interact and hang out with outside work. So, I think I can suggest to my boss is to have communication between employer and employee. It is important for them to talk with us and know our story. It is important for them

	nila ang story namin nasa ganun malalaman rin ng mga boss naming kung ano yung mga pinag dadaanan ng mga trabador nila ditto sa japan at pano nila matrato mga tao nila. Bonding din yung kailangan para maiwasan ang homesickeness, stress, at depression. Yun lang sa tingin ko.	to know what their workers are experiencing here in Japan as foreign workers so that they will be able to know how to treat us properly. I think bonding is also needed so that homesickness, depression, and stress will be avoided.
• Do you have other social media communication strategies that you want to suggest?	Sa loob ng company bawal gumamit ng cellphone pero pag breaktime naman pwede naman basta ikaw lang yung tinututukan ng camera pero if you are showing around, I think bawal yun. Rule yun. Freely naman gumamit ng social media sa work pero wag lang during work at pwede lang sa breaktime.	In my company, it is not allowed to use cellphone during working hours but we can use it in break time as long as you will not show the inside private compartments of inside the company. That's the rule. We can freely use social media in work but only during breaktime.

Questions	Answer	Translation
What are the depression symptoms you experience as a Filipino migrant worker in Japan?	(1) Feeling tired sometimes. (2) Low appetite or energy. Usahay, kana murag ganahan rako muhigda (3) Feeling of sadness (4) Worrying usahay so maybe yes	(1) I feel tired sometimes. (2) Sometimes, I have low appetite and energy. I just want to lay down in my bed. (3) I have feeling of sadness. (4) Sometimes, I worry.
• When do you feel these symptoms?	Kanang kuan muduty ko unya inig balik nako sa balay wala koy kauban kay naa man mi kauban sa usa ka balay unya lahi-lahi mi nga rooms, lain-lain man mig duty so kung mu-duty sila for example graveyard ko mu-out ko og morning, musulod silage morning unya ako ra usa murag hilom ba murag hala oy ka mingaw. Ingon ana lang.	I live in one house with my fellow nurses but we have different rooms and different schedules. After my duty, I return to our house but there is no one with me. For example, my duty schedule is a graveyard shift and I go home in the morning at that same time, my workmates are about to go to work. So, we don't bump into each other. I end up being alone and the house is so quiet. I realize it's so lonely.
• Do you experience other	Kay murag di man sad gud nako gnaconsider	I choose not to consider it as depression but

depressive symptoms?	nga depression jud para sa ako murag lonely lang. mahulog nga lonely ko kay ako ra usa.	rather lonely. It seems I am lonely because I am alone.
• Do you acknowledge that you are experiencing these symptoms?	Oo.	I acknowledge that I experience these symptoms.
What are the social media platforms that you use in dealing with depression symptoms?	Kuan YouTube, NetFlix, Facebook. Messenger of course mao na means of communication sa ako family. Tigview rako video sa TikTok. Instagram oo.	I think Facebook, Netflix, and YouTube. Of course, facebook messenger because it's the mean of communication that I use to contact my family. I just view videos on TikTok and in Instagram, too. Usually funny videos, world updates, and gossips.
• What are your reasons why do you use these social media platforms?	Kanang mingaw ang palibot ganahan ko og something magentertain nako. For example magkaon ko ako ra isa di ko anad kay katong before ko ni anhi sa Japan naa man jud ko nagpuyo sa akoang mama, akong mama mao jud nay muatiman namo, na used to ko nga naa koy kauban permi kaon mga ingon ana so katong naan ko sa Japan ako ra usa so di ko anad so mutawag mi messenger ako ra siyang tawagan ibutang ra nako sya tapos mag storya-	When I feel lonely, I want to be entertained. For example, I'm not used of eating alone. Before I came to Japan, I used to live with my mother. She takes care of us. I used to have someone with me every time I eat. So, when I came in Japan, I eat alone and I'm not used to it so I call my mother through facebook messenger. I can just place my phone anywhere and we can just talk even while eating.

	storya mi while gakaon. Ana ra.	
• Do you get any information when you use these social media?	Oo. Kanang mga funny videos kanang mga update sa world mga news, mga marites, mga ana. Kabalo naka.	Yes, there are. I like to watch funny videos and world news and updates, buzz. You know that.
• So do you feel entertained every time you use these platforms?	Oo. Entertained mao jud na mao jud na usa sa reason ganahan ko nay ma entertain nko.	Yes, I am entertained. That's really the reason why I use social media so that I will be entertained.
• When you're sad you are distracted through the use of social media?	Yes distraction and diversion sa imo attention.	Yes, I use social media for diversion and distraction.
• What social media platform do you use when you contact your family?	Messenger when I contact my family.	I use facebook messenger when I contact my family.
• In a day, how many hours do you use social media?	Hala! Guilty. Until makatulog ko. Mga siguro 5 or 6 hours. Diba? Magtawag mi usahay sa akoang mama mga 2 -3 hours kapain. Maga ana.	I am guilty. I use social media until I fall asleep, maybe around 5-6 hours in a day. Sometimes, when I call my mother, we talk for almost 2-3 hours.
• So, does social media really help you?	Nakatabang jud as in. Imagine kung kita sauna magsulat-sulat man diba, kita ko sa akoa mama	Yes, it really helped me. Imagine if we are still exchanging written letters like in the time of my

	og papa magsulat-sulat ra sila pero karon naan a silay messenger so paspas kaayo makatawag ra daun ka unya makita pajud nimo kay naa man kayvideo so diba murag live imo feels.	mother and father, but now we have facebook messenger so everything is just fast. You can just call them at the same time you can see them so it feels like they are just there.
What are the positive effects of social media in relation to your depression symptoms?	Yes. Nay positive. Ang positive kay number 1, ma-entertain ko, malingaw ko ana. Dayon ang usa sa, kanang maka connect gypon ko sa akong mga family, updated ko nila kung kumusta na sila so di ko magworry unya naa koy kastoryahan sa akong ganahan i-istorya kanang kung naa ba koy problema or naa koy gina huna-huna, ganahan ko nay ka storya so mutawag ko sa akoang mga friends mga ana, sa akong mama sa akong family. Unya upadated ka sa mga panghitabo. Mao ra	Yes, there are positive effects of using social media. First, I am entertained. Another, social media connects me to my family and I'm updated about their lives so that I would not worry about them. I can also talk to someone about things that I want to share if I have a problem or if am thinking about things. I really like that I have someone to talk to that's why I call my friends, my mother, and my family. Also, you are updated of the things.
• Does it have a positive effect for you emotionally?	Yes, instead nga ma down ka instead nga ma feel nimo nga nag inusara ka murag ma uplift imong emtions you know mahappy ka ma kuan io mga happy hormones ma stimulate	Yes, it has a positive effect on my emotions. Instead of feeling down when I am alone, my emotions get uplifted so you will know that you'll be happy because your happy hormones are stimulated.

• Does it have a positive effect for you physically?	Yes, kanang ma inspire ka sa mga kuan karon, kannag ganahan man jud kog fashion, ma inspired ka manamit ba kanang ang imong attention murag kanang ganahan lage ko ani nga sanina so sympre diba mga ingon ana nga mga butang mas ganahan pa ka nga mo move on sa imong kinabuhi ay ganahan ko nga ingon ani akong buhok sunod, inon ani akoang suoton sunod.	Yes, it has a positive effect on me physically. I am inspired about my fashion. I am inspired to dress well. My attention is drawn to the dresses and it make me think that I want to dress like what I saw or even have the same hairstyle. It inspires me that as I move on with my life, I want to be as presentable as possible.
• Does it have a positive effect for you psychologically/cognitively?	Psychological. Yes kana ganing naa koy makita sa facebook kanang suicide mga ingon ana so mas ma kuan nako ang importance sa kinabuhi ba. Hala oy naa paman diay mga tao nga grabe pa kaayo ang problema no ngano magproblema man ko og mayo sa akong problema nga mas grabe pa ilang problema unya nganong ni-give up mani sila oy kasayang sa imong kinabuhi. Murag ang impact nga ginahatag sab sa akoa kay murag holistically. Oo. Daghan kag nalearn murag na understand	Yes, it has a positive psychological effect on me. For example, I saw on the news feed on facebook about suicide, it made me think about the importance of life. It made me think that there are people who have a lot of bigger problems than mine. I think about why they gave up about life. This perspective gives me a holistic appreciation about life in general. I was able to learn and understand people who in different situations because of the information I get from facebook and YouTube.

	nimo ang situation nimo o sitiuutaion sa uban tungod sa pagshare2 sa mga info sa youtueb or facebook.	
• Does it have a positive effect on your work performance?	Oo. Kanang ganahan man sab gud ko magtan-aw tan-aw kanang mga videos about nursing kanang mga updated information about sa nursing ingon ana. So murag ma apply sab nako sya sa akong job. It's helpful. Productive kaayo ang social media	Yes, it has a positive effect on my work performance. I like to watch about videos related to my profession which is nursing. I am updated about the latest trends of my profession. So, I am able to apply in my job of the things that I saw. It's helpful. Social media is so productive.
• Does it have a positive effect on your social relations?	Oo. Mas na kuan na strengthen amoang bond sa mga friends murag instead nga magkalimtanay magkakumustahay gihapon. Mao na siya	Yes, it has a positive effect on my social relations. It made my bond with my friends even tighter. Instead of being able to forget one another, we are able to check on ourselves because of social media.
What are the negative effects of social media usage in dealing with your depression symptoms?	Siguro kannag kuan di nako makatarong og tulog kay sige nako og tan-aw, sige nako og gamit ba unya ma kuan ang sleep deprived so mao na akoang gnabuhat karon nag set ko sa akoang phone nga kanang 1 hour lang sa facebook usahay kay snooze-snooze, five minutes more.	Maybe, the negative effect is being unable to sleep properly because I use my social media for a long time. As a result, my sleep is deprived. Now, I manage it by setting only an hour facebook usage or using snooze for 5 minutes.

• Do you have other negative effects on you emotionally, physically, psychologically/cognitively, work performance, and social relations?	Unsa pamay lain negative oy. Balance lang na and be responsible.	You just need to balance your usage and be responsible.
Does social media give your more positive or negative impacts in dealing with depression symptoms?	Mas positive.	There are more positive effects of social media over then the negative effects.
Do you think social media usage cultivate resiliency of OFW? Why do you think so?	Oo para nako kay puro sa Japan kay ang Japan is very ano baya kuan very quiet place, not really quiet pero kanng mga people diri kay dili ganahan og saba unya kita sa Philippines if ma sad ta mag karaoke man ta diba, di ta kabuhat ana diria sa Japan, we are limited like what we can do in the hilippines, we cannot do it here kung gustohon man nato miskan anytime so kailangan controlled ta diria ba. Ginalimit kay tungod ga adjust ta sa ilang culture siyempre kailangan nato i-respectkay naa biya ta dri sa ilang country	For me, yes. Japan is a very quiet country. The people living here doesn't like noise and loud while we in the Philippines, if we get sad, we go to karaoke. But here, we can't do it just as how we can freely do it in the Philippines. We are limited on the things that we can do in Japan. We need to control what should we will be doing. We need to respect and adjust with their culture since we are in their country.

	So para nako makatabang ang social media kay maoy makahelp nila nga di sila ma lonely maginusara, di mag give up sa kinabuhi. Mas mag pursige pajud ba kay naa biyay mga inspirations sa faceboo for example katong mga OFWs nga nakabalay na kay naningkamot og trabaho diba? Unya nag overtime sa trabaho para daghan og kwarta unya mushare sila giunsa nila paganhi sa Japan. Daghan nag matabangan.	So for me, social media could help Filipinos not to feel isolated, lonely, and give up on life. We can see success stories in facebook like those OFWs who were able to build a house because they persevered in life. Those who do overtime in their jobs so that they can earn more and they are able to share more. There are also stories about how they are able to go to Japan and through this they are able to help others as well.
What social media platforms do you recommend for fellow Filipino migrant workers to use when they experience depression symptoms?	Facebook and YouTube. Ang facebook man gud kay friendly user. Ang kining sa YouTube dali ra kaayo magtype ra ka og youtube.com or magdownload youtube app then no need of any account kailangan lang ka mag click click og mga videos, mga ingon ana Unya sa facebook, scroll lang ka. Automatic ra sya muhatag og kuan, mag search ba niya ka ron og cute dogs or cute cats, mugawas dayon ang mga cute videos malingaw na dayon ka	Facebook and YouTube. Facebook is user-friendly. On the other hand, in YouTube, you could just type youtube.com or download the app. There's no need for you to have an account. You just need to click on the videos that you want to watch. In facebook, you will just scroll. It automatically feeds you information that you want. For example, you can search about cute dogs and cats then videos of it will appear and you'll get entertained after.
How can you suggest the usage of	Youtube. Kanang YouTube. Kay daghan man	I suggest YouTube. In YouTube, you are able to

social media in your workplace in relation to depression symptoms?	gud kag ma kuan ang facebook man gud kay popular, kuan siya ba unsay tawag ani, biskag unsa nalang gani pero ang youtube kay mura syag organized so kailangan ka musearch sa unssa man imo ganahan i-search diba para mugawas tong mga results. Unya for example, kanang kung mushare kag information pwede nimo ibutang sa youtube unya kung i-allow sa imong company. For example, depression awareness, ingon ana. Mga ingon ana, for example i-allow nila ang social media, mga hapon man gud medyo maulawon unya mga private ban ga mga individuals so medyo akoang i-answer kay medyo nag duha-duha pako unsaon kay di ko ka imagine ba kay inig sila dili kaayo sila ganahan anang mga publicity. So pero kung i-allow nila ingon ana sila ka open-minded kay kuan akoang i-introduce ang youtube kay in youtube you can upload like videos unya pwede nimo i-play sa inyong	filter what you want to see because it is categorized compared with facebook where any information may appear. YouTube is more organized. You just need to search what you like to watch and the results will come out. For example, if you want to share an information, you can upload in YouTube, if your company allows awareness, something like that. it. For example, videos about depression The Japanese are very shy and private that's why I have doubts with my answer. They shy away from publicity. But if ever they allow social media in work and they are open-minded enough, I will introduce YouTube. We can upload videos that are valuable in your workplace at YouTube. You can share it with your colleagues.

	workplace or pwede nimoishare sa imong co-workers mao ni mao na.	
• Do you have other social media communication strategies that you want to suggest?	Siguro facebook ra gihapon kay sa facebook man gud maka post kag kanang kuan ba message so pwede nimo i-type didto unsay mga advice nila or mga ingon ana especially katong ganahan lang magbasa2 nga mga tao labi na katong dili ganahan og mga saba. Oo kanang fb group for example sa inyong unit. For example, ingon ani sa inyong facebook group maka storya dadto ingon ani naa kay any advice for this because I have a problem ingon ani ingon ana. I-anonymous lang gud nimo inig maulaw ka. Naa man gud something sa facebook diba sa group page nga pwede nimo i-anonymous which is nice dili sila ma shy nga mu ano mu open up unya maka share2 ang mga tao sa mga opinions nila and suggestions	Also, the use of facebook. In facebook, you can post messages. So, in this platform, you can ask advice or read any relevant information especially for those workers who does not like noise or are very private. For example, we can make a facebook group for our unit. In your facebook group, you can ask for any advice if you have a problem but they have an option to be anonymous if you are shy enough to share your identity. You can also do the same if you want to share your other suggestions or opinions.

Respondent C

Respondent	Office Worker	

Interview Date	August 09, 2023	
Duration	17:54 minutes

Questions	**Answers**	**Translation**
What are the depression symptoms you experience as a Filipino migrant worker in Japan?	Yung mga naranasan ko siguro yung mga pinaka naransan ko sa pisikal siguro eto lang ang pagiging pagod. Yun lang. tapos sa emotional siguro ano lang hirap lang makatulog. Yun lang naman. Siguro ano etong andami kong iniisipyung yung anong pwedeng mangyayari. Mga ganun.	I think the depression symptoms that I really experienced physically is just feeling fatigue. That's all. Emotionally, I think difficulty in sleeping. I think that's all. I think racing thoughts like thinking about what can happen anytime. Like that.
• Does being a migrant worker has a factor on feeling these depression symptoms?	Oo naman. Nakaka apekto ang pagiging OFW kaya naranasan ko to. Malaking bagay sya na lalo na pag mag-isa lang ako pag gabi na kasi biglaan lang tong mga nangyayari hindi ito yung tipong alam ko mangyayari na parang mararamdaman mo lang bigla to eh. Kahit ang saya saya mo nang umaga tapos biglang may nag trigger sayo para biglaan nalang mapupunta ka sa funk na yun.	Yes, I think so. Being an OFW affects how I feel right now. It is a big factor especially when I am just alone at night. These feelings just randomly occur and it is not something that you know will happen to you. You will just feel it suddenly. Even if you are so happy in the morning but suddenly something triggered you to feel that way.

• Do you acknowledge that you are experiencing these symptoms?	Yes, aware ako.	Yes, I am aware.
What are the social media platforms that you use in dealing with depression symptoms?	So ang unang-unang ginagamit ko ay ang facebook messenger kasi yun ang ginagamit ko pang communicate ko sa aking kasintahan sa aking pamilya, sa aking mga kaibigan sa pilipinas. Pangalawa is facebook kasi doon ako nguupdate sa mga pangyayari sa bansa natin tapos yung mga group ako duon na sinasalihan na like-minded people. Tapos synpre YouTube pag wala akong magawa, nanunuod lang ako ng YouTube saka minsan Whats App at Viber kasi if di gumagana ang messenger dun ako nag cocommunicate. Yun lang naman. Well, eto LINE din pala pero nag LINE lang ako nung andito na ako sa Japan. Kasi yun yung ginagamit dito. It is more of a tool kaya ayun. Yes. Yun lang naman.	First, I use facebook messenger because it is what I am using to communicate with my girlfriend, family, and friends in the Philippines. Second, is facebook since I update myself about the whereabouts of our country and I joined groups with like-minded people. Of course, YouTube! If I don't do anything, I just watch YouTube. Sometimes, I use WhatsApp and Viber if facebook messenger is malfunctioning so I communicate there. I think that's all. Well, I also use LINE but I just used it when I lived here. LINE is the communication tool used in Japan. Yes, it is more of a tool. I think that's all.

What are the positive effects of social media in relation to your depression symptoms?	Meron naman. Unang-una nakakatulong siyang makakalimot ng lungkot kahit papano. Yun ang pinaka Malaki ang tulong nya para sa akin at saka ayun sa messenger at line it's a tool siya para connected ka sa mga tao yun naman. Yun ang pinaka.	There are. First, it helps me forget the feeling of being sad. That is the greatest help that it gives me. Also, I use facebook messenger and LINE as a tool to connect with the people. That is its best purpose.
• Does it have a positive effect for you emotionally?	Oo. Meron naman din. Kunyare namimiss ko yung gf ko so I can use messenger para tawagan sya anytime. Kunwari at hindi ako namimiss out sa facebook yung mga kaibigan ko ng popost dun. Hindi ako namimiss out sa mga nangyayari sa kanila ganun. So pag umuwi ako nagkwekentohan lang kami. Alam ko saan sila pumunta, nakakasabay ako sa kwentohan nila.	Yes, there is. For example, if I miss my girlfriend I can use facebook messenger so that I can call her anytime. Now with facebook, I would not miss out about the whereabouts and I will see posts of my friends. I will not also miss out what is happening with them. So, if ever I'll go home, we can talk about it. I know where did they go and I can easily catch up with them.
• Does it have a positive effect for you physically?	Oo. Sa youtube marami akong sinusundan na mga health coaches and it helps me maintain my lifestyle kahit papano. So marami akong natututunan.	Physically, yes. In YouTube, I follow many health coaches and it helps me maintain my lifestyle. So, I learn many things from watching videos.
• Does it have a positive effect for you psychologically/cognitively?	Alam mo hindi ko masyadong pansin kung meron. Pero ang masasabi kois hindi kasi ako ngpapakalunod sa social media eh. So psychologically speaking, hindi ako yung,	You know, I don't give much attention if there is but all I can say is I don't really drown myself in social media. I am not that kind of person. I just use it to connect with people. I don't let

	ginagamit ko lang sya pang connect para sa mga tao so hindi ako nagpapalunod sa mga negative actually sa facebook ina-unfollow ko lahat ng mga ngpopost ng negative. So ayun. So I try to keep it light rin para hindi naman ako bumagsak dun sa problemang ganun.	myself be affected with negative feeds. Actually, in facebook, I un-follow all people who have negative posts. That is, it. So, I try to keep it light so that I will not be drowned into that same state of doing.
• Does it have a positive effect on your work performance?	Work performance. In a way yes. Kunwari youtube so nagagamit ko ang youtube sa mga lessons ko (Japanese).	In a way, yes. For example, YouTube. I use YouTube to get resources for my lessons.
• Does it have a positive effect on your social relations?	Yes kasi like I said it's the tool sya para connected ako sa mga tao hindi ako natatakot na biglang dahil hindi na kami nag cocommunicate lage masisira yung relationship na yun so nakaka if anything kung hindi nasestrenghten, at least namemaintain mo yung relationship ko with them.	Yes, because like I said, it is a tool for me to be connected with everyone. I am not afraid that I will lose any kind of relationship with them because I know that through facebook our relationship will be strengthened, if not, then maintained.
What are the negative effects of social media usage in dealing with your depression symptoms?	Okay. Like I said hindi ako yung tipong ngsosocial media ako pero hindo ako yung tipong na cucurious kung biglang may masamang nangyari na curios ako babasahin ko yun tapos mabwebwesit lang ako. Nope. I try to keep it calm. So kung makikita mo yung	Okay. Like I said, I am not that kind of person who uses social media who uses it when there is a fuss. Like when there is bad news and you will be curious about it and when you will read it, it will just give you a bad day. Nope! I try to keep it calm. So, if you can see my facebook it

	facebook ko puro tungkol sa laruan, sa music, sa comics, ganun. I'm pretty sure meron sya pero hindi ko pinapansin.	is just about toys, comics, and music. I am pretty sure there is but I don't mind and give attention to it.
Does social media give your more positive or negative impacts in dealing with depression symptoms?	Depende. Kasi it is how you use social media talaga sa akin. Para sa akin ginagamit ko sya para sa kapakanan ko so kung ikaw yung tipong mga marites na gagamit ng social media para lang makichismis magkakaroon, magiging may epekto yan sa personalidad mo yung tipong may masamang nangyari ngayon yung topic na yon magiging topic mo yun sa sandamakmak na basically because of that you are spreading negativity. At hindi naman ako ano to I also agree na social media malaking factor yan kung bakit andaming negatibong tao ngayon. So, ang sa akin, it is up to you how you handle your social media. So, kung mahilig ka sa negatibong bagay magiging negatibo ka talaga. Kung puro positive yung papanuorin mo, babasahin mo, magiging positive ka rin.	It really depends because it is about how you use social media. For me, I use it when it is necessary. So, if you are like a "marites" (gossiper) who uses social media just to get the latest fuss, then it will really have an effect on the formation of your personality for example, there is a negative topic then you will think of it a lot of times so basically because of that you are spreading negativity. But I also agree that social media has a huge factor why there are a lot of people with negative mindset. So, for me, it is up to you on how you will handle your social media. So, if you like negative things then you'll have negative mindset. If you'll watch and read positive things then you'll also have a positive mindset.

• So, for you it gives you more positive effect?	Yes.	For now, yes, it is more on positive.
Do you think social media usage cultivate resiliency of OFW? Why do you think so?	Interesting question. Oo at hindi. Oo, kasi like I said pwedeng magamit ng isang OFW yun para makalimot panandalian sa mga kalungkutan nila. Gamitin nila yun para mag connect. Ngayon, hindi, kasi depende sa emotional stability mo rin. May mga taong kilala na OFW na kilala na nang dahil sa facebook nakikita nilang nagsasaya pamilya nila mga kaibigan nila mas gusto nilang umuwi ngayon. So it is up to the emotional and psychological strength ng tao kung pano sila mgpapaapekto. Kasi kung ako kasi tinging ko personally. Ang tinging ko pag nakikita ko yung. Oo okay ang mga barkada ko pumunta ng baguio at least ang mindset ko ay kung umuwi ako kaya kong makipagkwentohan, excited akong margining kung ano yung ginawa nila. May mga tao na Nakita ko yung kaibigan ko sa baguio dapat kasama ako duon, bakit hindi ako kasama duon. Magsasaya sila tapos wala ako. One	Interesting question. Yes and No. Yes, because like I said OFWs can use social media so that they will forget the feeling of being sad. They can use it to connect with people. No because it depends in your emotional stability. There are OFW whom I know who get jealous and would want to go home every time they see their family and friends so happy. So, it is up to the emotional and psychological strength of a person as to how will they be affected. Because personally, if I see my friends having a trip to Baguio for example, then for me I will have a mindset that if ever I will go home then I can catch up with them and I am excited to hear about their trip in person. There are also people who would see it this way: I saw my friends in Baguio so I should be there too, why I wasn't able to be with them, they are happy without my presence, they went to Baguio without even telling me, maybe they

	thing leads to another dapat kasama ako duon, hindi man lang nila ako sinabihan na pupunta sila ng baguio. Siguro masaya sila dahil Nawala ako. It will create one negative thing will create another negative thing until it consumes you. So ayun. So depende talaga sa tao at saka emotional state at psychological state nya. I can only speak for myself na iniiwasan ko talaga mga negative parts ng facebook. Yes, it is your choice. Basically, facebook, all of these are tools depende kung papano mo gagamitin. Martilyo, pag ginamit mo yan makakabuo ka ng bahay. Pag ginamit mosa ibang bagay makakapatay ka ng ibang tao.	are happy without me. It will create one negative thing and it will create another negative thing until it consumes you. So, it really depend on the person and his/her emotional and psychological state. I can only speak for myself that I really choose to avoid the negative feeds on facebook. Yes, it my choice. Basically, facebook, all of these are tools and it is up to you on how you will us it. For example, a hammer. You can use it so that you can build a house but you can also use it to kill someone.
What social media platforms do you recommend for fellow Filipino migrant workers to use when they experience depression symptoms?	Una, facebook messenger kasi pwede silang makipagusap sa pamilya sa kaibigan nila or facebook messenger, line, whats app, basta anything na communication-based social media. Those are the number 1 apps na	First, facebook messenger because they can communicate with their family and friends or through LINE, WhatsApp, anything that is communication-based social media. Those are the number 1 applications that I recommend

	marerecommend ko talaga kasi may direct line ka sa mga tao. Pangalawa is YouTube. Once na makaranas ka nga mga sintomas na yon, andaming materials sa youtube na pwededng tumulong sayo na parang i-guide ka para magmeditate, mag relax, mag exercise, ganun. So ayun. Pero again, may mga matitigas ang ulo na depressed na nga manunuod pa ng mga nakakalungkot na videos. Wala na tayong magagawa dun. Choice na nila yun.	because you can have direct line with the person you want to communicate with. Second is YouTube. If you experience depression symptoms, there are many materials that you can find in YouTube that can help you and guide you to meditate, relax, exercise. But again, there are stubborn individuals. Even if they are already depressed, they would still watch sad videos. We cannot do anything about it. It is their choice.
How can you suggest the usage of social media in your workplace in relation to depression symptoms?	Interesting! Kung sa akin kasi ang facebook is the no. 1 social media ngayon. To be honest hindi ko nakikita kung paano gamitin, im pretty sure may mga makakaisip kung paano gamitin yan pero para sa akin sa ngayon mas youtube ako. Yung YouTube, like I said before, andaming videos na pwedeng ipanuod sa mga empleyado and access sa youtube is great in a sense na you can watch anything. Ang pwedeng gawin ng	Interesting! For me, I consider facebook as the number 1 social media now. To be honest, I can't see how facebook will be used in work but I'm pretty sure that there are people who know how to integrate it. Now, for me, I lean more on using YouTube. In YouTube, like I said before, there are many videos that you can let your employees watch and access to Youtube is great in a sense that you can watch anything there. The bosses can

	mga boss is once in a while mag movie night sila. Mag bonding. Iparamdam na pwedeng gamitin ng boss na yun na oy may ipapanuod ako sa inyong video pwede panuorin natin to. It doesn't necessarily have to be work related kahit nakakatawang video lang. bakit? Kasi at least mararamdaman ng employee na hindi lang sila empleyado sa isang office nag ki-care parin yung upper management sa kanila. At the same time, hindi matatakot ang empleyado na lumapit sa boss kapag may nararamdaman na sila. There are too many cases na gusto ko nang magpakamatay pero ayaw kong sabihin sa boss ko dahil baka pagalitan ako parang ganun. So ayun kung facebook I think bosses should keep their lines open sa totoo lang sokung hindi facebook ay yan yung line nila, yung messenger nila. They should be able to communicate. Sa akin kasi after office hours, don't talk about work. Pwede na kayong mag-usap o kumusta araw mo? ganun ganyan So ayun yuncommunication, empathy, and camaraderie pwedeng tools yun for upper	actually have a movie night with their employees through watching videos from YouTube. They can have bonding. Bosses can recommend videos that their employees may watch, and that they can watch it together. It doesn't have to be work-related. Even a simple funny video will do. With that, at least, the employee can feel that they are just not employees in an office but the upper management actually cares for them. At the same time, the employees will not be afraid to approach to their bosses if they feel anything. I know many cases that there are employees with suicidal thoughts but they are just afraid to speak up to their bosses because they may be reprimanded. I think the bosses should keep their lines open and one of which is facebook. If not facebook then their LINE or messenger account. They should be able to communicate. For me, after

	management para mas maging comfortable ang empleyado.	office hours, they should not talk about work. They can actually talk about anything. The upper management can utilize these tools to foster camaraderie, empathy, and communication with their employees.

Questions	**Answers**	**Translation**
What are the depression symptoms you experience as a Filipino migrant worker in Japan?	Minsan isip ka ng isip tapos sympre pagna depress ka kailangan mo lalabaslabas para libangan mo ba yung sarili. Daming iniisip. Oo ganun. minsan gusto ko nang umuwi ng pinas. Parang di naalis yun pag na eustress ka eh.	Sometimes you keep on thinking when you are depressed that's why you need to have a break so that you will be entertained. I think a lot of things. Sometimes, I think of going back to the Philippines. It seems that stress is always part of it.
• Do you isolate yourself?	Ino-isolate mo ba yung sarili mo? mmm. Oo. Sympre para ano ba … para sympre umano	Yes, I isolate myself. I do it because I need to be strong because I still have thing that I want

	tayo dito sa japan para tumagal tayo para ma ano din natin ang gusto natin sa buhay ba kaya ganun ginagawa ko.	to achieve in my life that's why I do it.
• Do you feel sadness?	Oo, nakakaranas di naman yun mawawala kasi sympre malayo tayo sa pamilya.	Yes, I also experienced sadness. I can't get rid of it because I am away from my family.
• Do you experience being worried?	Oo, yung kada papasok na sa trabaho iisipin mo bukas ano naman kaya ang gagawin kung marami bang trabaho kung pagod na naman ba.	Yes, I worry. every time I go to work. I always think about the load of my work, what should I be doing, if I have many tasks, and if I will be tired again from work.
• Do you have difficulty in sleeping?	Oo, minsan. Minsan kaya ang ginagawa ko tinatagayan nlng para makatulog.	Yes, Sometimes, I have a hard time in falling asleep so sometimes I drink liquor so that I can sleep.
• Do you experience headache?	Minsan. Minsan ganito kaya may dala akong epikasent.	Sometimes I experience headache, that's why I always have an efficascent oil with me all the time.
• So, you are aware that you experience depression symptoms?	Aware ka ba na depressed ka? Oo aware naman. Oo naranasan ko yan ditto. Minsan sakit ng tiyan, nang kutu-kuto, kung anu-anong iniisip. Parang ganun.	Yes, I am aware that I am experiencing depression symptoms. I experienced it here in Japan. Sometime I have stomachache and racing thoughts.
What are the social media platforms that you use in dealing with depression symptoms? What	Ano facebook, YouTube tapos LINE ginagamit ko rin. Instagram nag aano titingin lang minsan. Facebook messenger. TikTok.	Facebook, YouTube, and LINE. I use Instagram for viewing purposes only. I also use facebook messenger and TikTok.

are your reasons of your usage?	Sa facebook kasi sympre makikita mo yung mga kaibigan mo yung mga pamilya mo parang ano ba namiss mo ba sa Pinas sympre sa facebook mo ma aano lahat makikita ganyan. Sa TikTok naman yan maraming video, iba-iba parang mga kasayahan ba nawawala yung stress mo ba pagka nakakanuod ka ng kasayahan ng mga pinoy.	In facebook, you can see posts about your friends and family and when I miss the Philippines, I can see everything in facebook. In TikTok, there are many videos. Different genres of videos like for fun that's why my stress is gone when I watch fun videos of Filipinos.
	Yung sa line naman ginagamit ko kasi yung kaibigan kong hapon line yung gamit kaya ngchachat ganun.	In LINE, I use it because my Japanese friends use it when they communicate with me.
	Para yung depress natin medyo mabawas-bawasan ba para ma aliw-aliw yung utak natin kasi pagka pinabayaan baka ma sobra.	So that my depression will be lessened and my mind will be entertained because if I will not do something about it, it might get worse.
	(YouTube) Mga pelikula yung pelikulang pinoy ba. Barilan, comedy.	Yes, I watch YouTube. I watch Filipino movies like action movies and comedy videos.
	(messenger) videocall sa pamilya sa pilipinas para ano rin ba yung hindi mo talaga sila ma	I also do videocall with my family in the Philippines so that I will not really miss them.

	sobrang miss bakaya laking bagay din talaga kasi mayroon kang makakausap.	It's a huge help when you can talk with someone.
• What are the other reasons of your usage?	Ano rin sa facebook kasi nakikita ko ano eh may group kasi jan na ano yung sa Japanese language kaya ina-ano ko yung tinitignan-tignan ko yung group nila, basa-basa, aral-aral ganun. Oo nakakatulong naman sa youtube din yung mga pakikinig ng Japanese. Oo nanunuod, konting aral para. Nakikinig ng music Japanese song, mga opm sa youtube . Sa TV kasi naming naka-connect sya sa YouTube.	In facebook, there is a group for those who are learning the Japanese language so I joined in that group and I watch and read the learning materials that posted there. I also use YouTube when I learn Japanese through listening drills and activities. I listen to Japanese and Filipino music and songs in YouTube. The TV in our dormitory is connected to YouTube.
What are the positive effects of social media in relation to your depression symptoms?	Oo may positive naman siya kasi sympre pag walang social media yung depress natin baka lumaki-ng lumaki dahil sa social media makakausap mo yung pamilya mo makakapag nunuod kayo ng comedy para maging masaya din ba rin yung ano lungkot.	Yes, there are positive effects of social media. If there is no social media, my depression may get worst. Because of social media, I am able to talk with my family. If I watch comedy videos, I feel and somehow my loneliness is gone.
• Does it have a positive effect for you emotionally?	Kasi minsan pagka sobrang yung parang sobrang lungkot ko na bamanunuod lang ng ano yung sa youtube video, comedy, barilan, yung mga pilipinong video. Yun medyo	Yes. Sometimes if I am very sad, I just watch videos on YouTube. I watch action and comedy videos. I watch Filipino videos then I feel better and then I call my parents.

	nababawasa-bawasan naman tapos tawag sa magulang.	
• Does it have a positive effect for you physically?	Ano naman meron din kasi sa Tiktok minsan kakapanuod ko parang naempluwensyahan ako sumayaw-sayaw para yung katawan ko rin parang naakit kasi dun sa tiktok pantanggal din ng kalungkutan minsan. Yung videoke yung karaoke.	Yes, there is. I watch dance videos in TikTok and it influences me to do the same so that I can also make my body move. It also lessens my loneliness. I also do karaoke.
• Does it have a positive effect for you psychologically/cognitively?	Oo. Sa facebook kasi doon ako don din ako halos na kumukuha ng ano eh mga ibang minemorize kong Japanese sa facebook dun sa group nga na _Japanese group tapos sa youtube nakikinig nman ng listening kaya karamihan nman kasi halos andun naman kasi halos lahat ng gusto mong pag-aralan.	Yes, there is. In facebook, I usually get information in our group page when I study Japanese. I also listen to listening drills and activities in YouTube because almost everything that you want to learn about could be found in YouTube.
• Does it have a positive effect on your work performance?	Kasi pag nasa trabaho kasi di nman halos ma ano yung selpon namin kasi bawal kasi pagbreaktime lang yung anu-ano kami kunwari may sinabi sila na hindi naming alam yung meaning itatype lang namin at isesearch.	At work, we can seldomly use our phones because it is not prohibited by our company. But we can use our phones at break time. But if there are words that we don't understand, we can use our phone for translation.
• Does it have a positive effect on your social relations?	Oo, kasi katulad si senpai na ano ko rin sa messenger nasa pinas pa yan nakaka chat ko na.	Yes. Just like how I met my senpai. Even when I was still in the Philippines, I already chatted

	kaya oo nakakarami rin ng mga friends. Karamihan ditto sa imabari sa ano ko lang din na ano sa messenger lang yan hanggang magkita-kita, magtagay-tagay ganun.	him through social media. Also, because of social media, I gained new friends. Most of my friends here in Imabari, I just met them through on line until we decide for a meet up.
What are the negative effects of social media usage in dealing with your depression symptoms?	Meron din naman. Sympre sa katuald ng sa youtube tiktok facebook ayan lahat ng ano social media may mga makikita kang video ba na masasama patayan nagnanakaw nagdodroga yun parang nakaka umaano rin sa utak mo yung mga ganun parang naiisip ko kung gumawa kaya ako ng ganun. oo masasamamng pagiisip pero konti lang.	Yes, there is. For example, in YouTube, facebook, and TikTok, there are videos that are harmful like killing, robbery, illegal drugs so it also comes in in my mind and lets me think what if I do the same or anything bad?
• Do you have other negative effects on you emotionally, physically, psychologically/cognitively, work performance, and social relations?	Ano lang pagpupuyat lang tapos kinabukasan pero hindi nman dahil sa social media sa pagpupuyat lang manuod tapos kinabukasan parang pagod. Pagpupuyat ng pag i-stalk. Naapektohan pagtulog.	Sometimes, my sleep is disturbed because I get to sleep late and wake up late because I use social media like stalking and watching videos.
Does social media give your more positive or negative impacts in dealing with depression symptoms?	Sa akin parang positive kasi sympre nasa Japan tayo kailangan natin ng social media para makausap mo yung pamilya makapanuod nga mga pilipinong movies para tanggal depression mga ganun games.	For me, there are more positive effects because I'm in Japan and I need social media so that I can talk with my family and also watch Filipino movies to feel less depressed. I also play games sometimes.

Do you think social media usage cultivate resiliency of OFW? Why do you think so?	Oo nakaktulong kasi kasi nga ano di ba nga malayo tayo sa pamilya hindi katulad ng unang panahon na sulat-sulat lang mahirap nman yung sulat-sulat ngayon kasi makaka video call mo na silaparang kasama mo lang sila sa araw-araw kasi may video tapos may boses pa na parang kasama mo lang din gabi-gabi sa bahay. Oo nakakabasa din ng mga ano yung mga dasal-dasal ba sa youtube or tiktok ganun.	Yes, it helps. As what I've said I am away from my family. Unlike before, they only communicate through written mails but now we can do video call with your family and it feels like you are always with them every day because you can see them in the videos and you can also hear them. Yes, it makes me feel more resilient. I also read motivational and spiritual videos in YouTube and TikTok.
What social media platforms do you recommend for fellow Filipino migrant workers to use when they experience depression symptoms?	Ano lang naman facebook tiktok youtubeyun naman mga karamihan kasi karamhian kasi mga video tapos sa facebook makikita mo yung mga parente mo yun din sa tiktok sa youtube naman marami nman kasing video dun kaya tanggal talaga yung stress mo dun sa panunuod mo ng video, karaoke.	I think facebook, TikTok, and YouTube. You can see many videos in YouTube and TikTok while in facebook you can see the posts of your relatives that's why my stress is lessened if I watch videos and do karaoke.
How can you suggest the usage of social media in your workplace in relation to depression symptoms?	Katulad sa ano sa sa google may hindi ka naintindihan na ano Japanese language ise-search mo lang dun tapos kung ano yung lumabas edi magtype ka na lang dun sa google ng gusto mong sabihin para ma ireply mo ng	For example, If I don't understand a Japanese word, I use google to search about it. I just also type my response by using google translation so that there I can properly reply to my boss.

	maayos sa boss mo. tsaka kunwari yung ano ba yung. Wala na yun lang kasi naisip ko kasi hindi naman halos ma gamit pagka magtrabaho breaktime lang talaga. Pwedeng gumamit ng facebook sa breaktime tumatawag kasi ako sa nanay at tatay.	That's what I can think about because we can't use much of our phones at work, only during breaktime. Though, we can use facebook in our break time and sometimes I call my mother and father during break time.

Questions	**Answers**	**Translation**
What are the depression symptoms you experience as a Filipino migrant worker in Japan?	For usually isolating oneself, it happened more on the winter season. I don't want to be outside with anybody else because the weather makes me want to stay at home. I don't want to go outside because it is hard to bear the cold so I want to stay inside more. I just really want to	Usually, I isolate myself during winter season. I don't want to be outside wit anybody else because the weather makes me want to stay at home. I don't want to go outside because it is hard to bear the cold so I want to stay inside more. I just really want to stay away from

	stay away from people because it is too cold kumbaga walang araw kasi. Winter has longer nights and shorter days so the darkness makes me want to just stay at home. It affects the way; it is called seasonal affective disorder. If it is dark, I don't like, I really like the light. So, fatigue, tired and restlessness. There are days where in even if I have 8 hours of sleep, I don't want to go to work. My body feels heavy, my mind is frogging particularly I just don't want to be around with people. That's what it goes around. Panic attacks. I have been diagnosed by our school when I was in college. I was diagnosed by the school psychiatrist I forgot the term. He is a doctor but focuses on psychiatric disorders I don't know the term for that. I have had symptoms of panic and anxiety disorder and he diagnosed me with panic and anxiety disorder so when I was here being here being alone and surrounded by foreign people with a foreign	people because it is too cold because there is no sunlight, no warmth. Winter has longer nights and shorter days so the darkness makes me want to just stay at home. It is called seasonal affective disorder and it affects me. If it is dark, I don't like it. When I was a teacher before in the Philippines, I was asked to be the guidance counselor to talk about this so that the kids know and they know how will I cope and adjust if a am experiencing it.

	I arrived august 2022, so around 7 if I am not mistaken. Auguste September October November December January February march April . Nine months. Wow! Yes yes almost one year. I am working as an Assistant Language Teacher (ALT) Usually, the biggest the best advice given to me walking around. I walk around for example in my desk usually if I'm idle it happens, the panic attacks happens because thoughts race from my head, a lot of factors around me, environmental factors like I don't understand the language that panic attacks trigger. The best advice always given to me is to stand up, walk, take deep breaths to lessen the risk kasi usually kapag nagpapanic attack ako nag raraise yung heart beat ko so I would take deep breaths to calm it down Then second thing that they told me is think of	I arrived in August 2022, so I am around 7 months if I am not mistaken-August, September, October, November, December, January, February, March, and April. months. Wow! That's nine months. Almost 1 year. I am working as an Assistant Language Teacher (ALT) Usually, the biggest and the best advice given to me walking around. I walk around for example in my desk usually if I'm idle it happens, the panic attacks happen because thoughts race from my head, a lot of factors around me, environmental factors like I don't understand the language that panic attacks trigger. The best advice always given to me is to stand up, walk, take deep breaths to lessen the risk because usually if I have panic attacks, my heart beat is racing fast so I need to take deep breathes to calm down. Then, the second thing that they told me is think

	five or ten things that you automatically see like tangible things like for example I could see your glasses white light, brown table what you see you verbalize it in your head it will bring you back to reality. So that's what I do to soothe the panic attacks. No meds, no meds, just walking and mindfulness. It helps me. Yes, yes, frequent negative thinking. It happens when I'm down time and idle thoughts it arrives like for example if I'm not being utilized at work then negative thoughts come kasi parang iniisip ko hindi naman ako kailangan like hindi naman ako kailangan like they don't need me and it makes me question my purpose why am I here? So it comes in, it comes in. so that is why the frequent negative thinking would trigger the feeling of hopeless and empty because when the negative thoughts start it spirals and it triggers other thoughts like for example why am I feeling empty it is more	of five or ten things that you automatically see like tangible things like for example I could see your glasses white light, brown table. I need to verbalize what I see and think in my head so it will bring me back to reality. So that's what I do to help me soothe the panic attacks. I have no medicines. Just walking and mindfulness. It helps me. Yes, yes, frequent negative thinking. It happens when I'm down time and idle thoughts arrives like for example if I'm not being utilized at work then negative thoughts come. I think that I'm useless and because they don't utilize me. I think that if they don't need me, it makes me question my purpose why am I here? So, it comes in, so that is why the frequent negative thinking would trigger the feeling of hopeless and being empty because when the negative thoughts start it spirals and it triggers other thoughts like for example why am I feeling empty it is more of when you feel negative

	of when you feel negative nothing is going right in the world parang ayaw ko nang gusting maramdaman anong nangyayari sa mundo so you feel empty about it. Hopeless. Every time that I see that I am not utilized at work parang iniisip ko na wala na, parang hanggang dito lang yung ability ko pala. Nobody is going to maximize my ability for something else that's why I'll be hopeless more often and recurring feeling of sadness because being alone it is just a chain effect like it is a chain it brings me this to suicidal thoughts. Its is very heavy, it is very hard. How do I put it? Actually, ngstart pa sya in 2018, 2019, I was diagnosed in college that is around 2012, 2013, 2013-2014 I was diagnosed. 2016, six years after I took therapy. It was ok but. So it recurred 2017 and I took therapy and it 2019 nagrecurr yung thoughts same thing old work not feeling yun at at home, at work it would	nothing is going right in the world so you don't want to feel anything at all so you feel empty about it. Hopeless. Every time that I see that I am not utilized at work I think that that's it, that's the best of my ability of that can be used and utilized. Nobody is going to maximize my ability for something else that's why I'll be hopeless more often and has a recurring feeling of sadness because of being alone. It is just a chain effect; it brings me this to suicidal thoughts. It's very heavy. It is very hard. How do I put it? Actually, it started in 2018? 2019? I was diagnosed in college 2013-2014, around 2016, six years ago. After, I took therapy, it was ok but it recurred 2017 and I took another therapy. In 2019, it recurred again with the same thoughts when I am at home or at work, it would recur like when I would drive sometimes, I would just

	recur like when I would drive sometimes the feeling of I would just want to drop my car. It is there, it just triggers. Being quiet really triggers sometimes. Japan is a quiet country. Being alone in a quiet place and sometimes it is a ano sya eh tawag ditto parang domino effect when I am thinking of negative thoughts then it spiral to different triggers my head gets heavy. It is like there was a time that I would want to parang I just want to shut my brain out parang gusto mo lang patahimikin ulo mo. there times where I just want tumahimik ka tumahimik ka. Those thoughts na what if I will just end it so that the pounding will just go away and it happens. It is a bit heavy but what I like is when people would ask me about it, just me sharing about it is really helpful.	feel to drop my car. It is there, it just triggers. Being quiet really triggers sometimes. Japan is a quiet country. Being alone in a quiet place and sometimes it is a domino effect when I am thinking of negative thoughts then it spirals to different triggers and my head get heavy. It is like there was a time that I would want to shut my brain out. There were times where I just want to tell myself to just be quiet. Those thoughts of what if I will just end it so that the pounding will just go away and it happens. It is a bit heavy but what I like is when people would ask me about it, just me sharing about it is really helpful.
• So you are aware that you are experiencing these depression symptoms?	Yes, I am aware even until now. Hindi siya everyday. There are highs and lows, there are ups and downs and I am able to cope one way or another. But you call it here wwaves diba?	Yes, I am aware even until now though it is not every day. There are highs and lows, there are ups and downs and I am able to cope one way or

		another. But you call it here waves, right?
What are the social media platforms that you use in dealing with depression symptoms? How and why do you use these platforms?	Is Netflix ok? So first of all, my recent mechanism is Netflix and this time I choose Netflix because the shows that I want to watch are accessible and it is easy to access comedy shows to and I've been watching slamdunk and sobrang comedy sya. It's comedy and it's helping me cope so if I laugh, I get to have a good fun time. My depressive thoughts are sometimes will go away and Netflix has been a big help. Parang na divert at the same time entertained. So, it helps. Viber is because that's yan yung main app na ginagamit ko at naming pamilya. So viber lagi kay mama so pagnaguupdate siya and it helps so it helps having a support system so it helps a lot. Facebook messenger too with my friends we talk a lot especially with these apps	Is Netflix ok? So first of all, my recent mechanism is Netflix and this time I choose Netflix because the shows that I want to watch are accessible and it is easy to access comedy shows to and I've been watching Slamdunk and it's so comedic. It's helping me cope so if I laugh, I get to have a good and fun time. My depressive thoughts are sometimes going away and Netflix has been a big help. It gave me diversion and at the same time I am entertained, so it helps. Viber is because it's the main application that family uses. I contact and update my mother though viber. It helps so having a support system. I also use facebook messenger when I talk with my friends and we talk in this app.

	YouTube yes because again yung mga naghahanap ako ng mga light-hearted na shows dinadivert nya yung feelings ko and it helps a lot as long as its comedy, it's fun, it diverts my thoughts and makes me feel better about it. Line is for communication too. Especially support system from our ALT friends in Japan it helps a lot. Facebook. Photography has helped me cope so whenever I post on facebook my pictures and Instagram kumbaga I am focusing on my hobby, I feel better, I feel I am working on a skill that helps me not think of a problem and triggers my other stuff so that has been a good outlet to help me cope and survive.	YouTube. When I search for light-hearted shows in YouTube, it diverts my feelings and it really helps a lot. As long as it's fun, if it's comedy, it diverts my thoughts and makes me feel better about it. Line is for communication, too. Especially the support system from our ALT friends in Japan. I feel I am working on a skill that helps me not think of a problem and triggers my other stuff so that has been a good outlet to help me cope and survive
What are the positive effects of social media in relation to your depression symptoms?	For me the best positive effect is as I mentioned, diverts the thoughts to a certain extent if I'm taking in media that's helpful, the thoughts will go away especially again if it's comedy, it can make me laugh, it can help me	For me the best positive effect is as I mentioned, diverts the thoughts to a certain extent if I'm taking in media that's helpful, the thoughts will go away especially again if it's comedy, it can make me laugh, it can help me divert. Second,

	divert. Second, parang ano sya eh mabilisan support system. Kapag may kailangan kang kausap compared before wherein phone calls take a long time ang you need to buy a card dial up diba. Social media can automatically connect you to family and friends and that helped me. So, communication and diversion of thoughts that's what social media has helped me in terms of dealing with these kinds of thoughts. The positive effects of social media.	it is a tool to have immediate support system. Unlike before that when you need to have a phone call you need to buy a dial up card for load but now if you need someone to talk to you can just reach them through social media. Social media can automatically connect you to family and friends and that helped me. So, communication and diversion of thoughts-that's what social media has helped me in terms of dealing with these kinds of thoughts. These are positive effects of social media.
• Does it have a positive effect for you emotionally?	Emotion. Yes, it has. Especially if I see, apart from comedy, if I see heartwarming videos like for example cute dog, it helps me parang it's a form of release coz I can get the media easily eh and diba dito kunyari walang TV or walang kausap so wala kang makikitang ibang information, sa social media kung may Makita akong ganun mas madali mag release ng sadness kasi may makikita. Yes, it helps me emotionally.	Emotion. Yes, it has. Especially if I see, apart from comedy, if I see heartwarming videos like for example, cute dog. It helps me release my emotion because I can get the media easily. If ever there's no TV or no one to talk to so I can just turn to social media to release what I feel. So, yes it helps me emotionally.
• Does it have a positive effect	Physically. Physically hindi pa. hindi ko pa	Physically, there is none. I haven't noticed any

for you physically?	nakikita kasi parang when I look at social media stagnant ako pag nagtitake in ako so parang naka upo lang ako di ako gumagalaw eh.	physical effect of using social to me. When I look at social media, I feel stagnant. I just sit down and does not move at all.
• Does it have a positive effect for you psychologically/cognitively?	Cognitive. Yes, it does help coz I can get for example yung mindfulness meron sila sa spotify, meron sila sa YouTube, so ayun nakakatulong sya nagiging guide sya sa akin how to gather information on how to cope with this and from trusted sources obviously.	Cognitively, yes it does help me. For example, learning the idea of mindfulness. I can listen and search about it on YouTube. So, it helps me guide my life on how to gather information and on how to cope with this and from trusted sources obviously.
• Does it have a positive effect on your work performance?	Work performance. Yes. Best example is whenever I have questions about work the groupchats are there to immediately respond and help, give information and sources that I need for work it's been very helpful talaga.	Yes, it has effect on my work performance. The best example is whenever I have questions about work, the group chats (GCs) are there to immediately respond, help, and give information and sources that I need for work. It's been really very helpful.
• Does it have a positive effect on your social relations?	Social relations. It's been positive. I would say kumbaga it would form good bonds with friends like apart from it for example nag usap kami the chat parang Nakita mopalang sa discussion na parang ah I feel like I am a part of this discussion and when I meet them in real life parang ganun parin parang nakakatulong	It's been positive when it comes to my social relations. I would say that because of social media, I formed good bonds with my friends. Apart from it, for example, when we have chats and discussions and I would feel that I am part of it and when we meet in person, we can also talk about it, too. So, it really helps me having

	talaga sya, it helps with the bond.	a bond with them.
What are the negative effects of social media usage in dealing with your depression symptoms?	Yes. It has also had a negative. One is that if I take in negative news like the worst way that it doesn't help is that feeling down and then I read on my feed something negative like a news of parang masamang balita sa gobyerno ganun, it's negative kasi ang nagyayari they call this doom's day scrolling like you just want to get negative news all through out. It becomes a black hole moment parang nahuhulog ako na ah kailangan negative negative negative so parang yung persona ko parang na eenject dahil dun tapos ang nangyayari ay yung feed ko lumalabas kasi nakikita nila purong negative so biglang sumusunod na nga videos puro negative like one time, I was reading negative news and the video was a negative video for example instant karma compilation parang may ginawang masama ang tapos makakarma siya agad so parang nag fifed yung negative energy ko so imbes na nakakalleviate sya, hindi so yun yung negative sakin kapag nakasimula na ako	Yes, it has also a negative. One, if I take in negative news like the worst way, it doesn't help. I feel more down when I read on my feed that is something negative like bad news about the government. They call this doom's day scrolling like you just want to get negative news all through out. It becomes a black hole moment like I'm falling in negativity so it affects my persona. The negativity is like injected in me. Also, if you keep on searching negative things, your feed will also be about negative thing. So, negative videos will come in my feed as well. One time, I was reading negative news and the video was a negative video for example instant karma compilation videos. Through watching these kinds of videos, it gives me more negative videos. Instead of being alleviated from negativity, it feeds me more negative feeds. In my case, when I started to read negative news, then the suggested feeds would all be about negative news and videos. It gets bad because it highlights my anger more and it doesn't help

	magbasa ng masamang balita tapos yung suggestive feeds ko puro negative videos, it gets bad because it highlights my anger more and it doesn't help back so for me that's negative.	back so for me that's negative.
• Do you have other negative effects on you emotionally, physically, psychologically/cognitively, work performance, and social relations?	Emotion is now more of anger. Physical is my muscle tends to panic attack and usually anger parang my fists clench up parang I want to punch; I want to scream like kunwari because I had to keep quiet in my house. Soyan yung mga ano. (Work performance) There was one time because during work, during lunch break, checking facebook during lunchbreak. So imagine during work, I was desk warming already I was quiet feeling hopeless already	In my emotions, it is more of affecting my anger issues. Physically, my muscle tends to panic and usually because of my anger, it's like my fists clench up like I want to punch. I want to scream but I don't have a choice but to keep quiet inside my house. In relation to my work performance, there was one time because in work, during lunch break. I was checking my facebook. I was already just having desk warming and I was quiet and feeling hopeless already not

	not being used by my JTEs and suddednly I read something negative on facebook so instead of being nice towards people so parang it's like parang na bad trip ako lalo parang umapekto na sya sa nagpatong na yung masamang balita, nagtrigger sya result na sya. (Social relations) Once because again I would use it during lunch break or sometimes after work but lunch break is minimum lang yung oras parang there was an argument that I had with my girlfriend and the one is using social media to get my message across wasn't enough so it affected my social relations with and afterwards I was able to pass things out but there are miscommunication because of social media.	being used by my JTEs. Suddenly, I read something negative on facebook so instead of being nice towards people, I got annoyed, so it had bad effect on my work. The negative news and vibes piled up and triggered me. In relation to my social relation, again I would use social media during break or sometimes after work. There was an argument that I had with my girlfriend because the social media that I was using haven't sent my message across so it affected my social relations with her. But afterwards, I was able to pass things out but there was miscommunication because of social media.
Does social media give your more positive or negative impacts in dealing with depression symptoms?	For me, it has been positive and it became more positive because I figured out what I need to take in and what I should not take in in social media so it became more positive with me. For example, once I know that I am taking negative	For me, it has been positive and it became more positive because I figured out what I need to take in and what I should not take in in social media so it became more positive with me. For example, once I know that I am taking negative

	media in like I cut it immediately, change it into positive to help me get through it so it becomes more like also my choice.	media in like I cut it immediately, change it into positive to help me get through it so it becomes more like also my choice.
Do you think social media usage cultivate resiliency of OFW? Why do you think so?	For me, yes. I think if you were to cut my social media off here, I would have a harder difficult time. Iniisip ko for example tumira ako ditto when hindi pa maganda yung information age ng mundo, I would have given up immediately.i think socialmedia has helped me get through tough times because as I communicate with people I get my support system as I get media that will help me through life nakakatulong sya. Mahirap kasi kapag, basta ako kasi support system, may kausap ako and social media has helped me connect and talk with people if it hasn't that bad, I wouldn't give up immediately I would say that.	For me, yes. I think if you were to cut my social media off here, I would have a harder difficult time. I think for example, I already lived here without the digital age, I would have given up immediately. I think social media has helped me get through tough times because as I communicate with people, I get my support system. As I get media that will help me through life, It helps me. I got used to have a support system, that I have someone to talk to and social media has helped me connect and talk with people if it hasn't that bad, I wouldn't give up immediately. I would say that.
What social media platforms do you recommend for fellow Filipino migrant workers to use when they experience depression symptoms?	I would suggest that any social media platform that can help as long as you know how to use it and you know what information that you need to get. For example, facebook can help as long as you get the right information and not misinformation coz once you are misinformed	I would suggest that any social media platform that can help as long as you know how to use it and you know what information that you need to get. For example, facebook can help as long as you get the right information and not misinformation because once you are

	with the details it won't help you. Same with youtube, TikTok, Instagram, all these platforms can help pero kapag mali yung impormasyon na kinuha mo hindi siya mkakatulong sayo.	misinformed with the details, it won't help you. It's the same with YouTube, TikTok, and Instagram. All these platforms can help but if you get and take wrong information the it will not help you.
How can you suggest the usage of social media in your workplace in relation to depression symptoms?	For me, the best way I would suggest is parang gamitin how to put this, gawin syang interdisciplinary parang for example work with human resource department if meron human resource department usually there would be like ah usually sa HR they go through psych training there's a way for them to help debrief their workers. Collaborate with those departments to social media to make suggestions to help the workers. For example, like HR can recommend mindfulness to help. They can provide credible youtube sources, facebook sources to help them. Kumbaga a department collaborate then use credible sources from these platforms to give to the workers that they can help cope themselves from this situations kumbaga offer programs collaboration will help. Makakatulong yun eh	For me, the best way I would suggest is to use social media interdisciplinary. For example, work with human resource department. Usually, the HR go through psychological training so there is a way for them to help debrief their co-workers. Collaborate with those departments to social media to make suggestions to help the workers. For example, HR can recommend mindfulness to help. They can provide credible YouTube sources, facebook sources to help them. It's like a department collaborate with the other departments and use credible sources from these platforms to give to the workers so that they can help cope themselves from these situations.

	lalo na para ma filter nung mga tao yung natitake in nila kahit alam mo meron may mag aagree basta alam mong ito ang pwede sa situation nila, makakatulong yun. So far within in our immediate group, our RA has always share that we can use the counselling session by CLAIR through skype. So I think we have our suggestions to help us and its through CLAIR's counseling service	It's like company can offer programs of collaboration and this will help especially on what media these workers take in. Even though the HR may already know some workers already have it but the company could still recommend depending on the situation that the worker feels. So far within in our immediate group, our Regional Adviser (RA) has always share that we can use the counselling session by CLAIR through skype. So, I think we have our suggestions to help us and its through CLAIR's counseling service
